

Programmer/Developer (m/f)

OMR Globus is a global healthcare market research company based in the United Kingdom and Canada. We are passionate about healthcare market research. On an individual project level, we use our wealth of experience to understand clients' requirements to provide real, actionable results. From full service research consulting, concept development and study design, to survey scripting, project management, fieldwork, data analysis and reporting across all channels, quantitative and qualitative.

We are now looking for a programmer to join the team of our subsidiary company Q One Tech Corporation.
