CLOUD HORIZON

We are Cloud Horizon, a team of passionate people that help businesses build their complex and sometimes life changing products. We also build some of our own products along the way. We're a team of 25 spread out across two offices in Montreal and Belgrade. Find out more about us on: www.cloudhorizon.com

We are looking for:

QA Engineer

to join our Belgrade team

About position...

Your mission would be to help us to deal with a few interesting projects including our own product. Besides, if you are interested in collaboration with a young and dynamic team which constantly experiments with new and better ways of building products, this could be an ideal position for you.

What we would expect from you?

- you have at least 2 years of experience in a QA role, although we value quality of experience much more than years of service
- you are a manual tester, but automated testing experience would be an advantage
- you have experience in testing web and mobile applications
- you have proven ability to write and execute concise test cases against product features
- you have experience in multitasking and handling a few projects simultaneously
- you have experience with using Jira and Confluence
- you are an expert in organization, prioritizing and planning
- you are a quick learner and creative problem solver
- you are fluent in English
- you are passionate about your job

What can you expect from Cloud Horizon?

- the possibility of working remotely 3 days per week
- flexible work schedule
- budget for mentors and conferences
- bonuses
- private health insurance
- interesting team-building activities
- unlimited amounts of top-notch tea, coffee & snacks
- opportunity to learn a lot
- opportunity to meet a lot very nice people just like you!

You can reach us by sending CV to careers@cloudhorizon.com.
