

eFront is the leading end-to-end software provider that changes the way the world looks at alternative investments. We have grown extensively year-on-year since our inception and now we serve more than 800 customers for over 20 years all over the globe, with offices across Europe, North America, Asia-Pacific and the Middle East. If you are looking for an opportunity to join talented fast-growing team, eFront is the right place for you!

We are looking for UI Design Intern*

Responsibilities:

- Help solve design problems and propose better user experience
- Produce high quality mockups for web applications
- Create and maintain assets for eFront UI guideline
- Manage font icon repository

About you:

- Third or final year of studies, completed basic university education or still on-going
- Familiar with wireframe and design tools such as Balsamiq, Adobe CS, Sketch or Figma
- Knowledge of visual design fundamentals including layout, color, and typography
- Previous experience with designing websites and mobile apps
- A portfolio that demonstrates professional and creative design
- Basic knowledge of HTML and CSS
- Fluent in English
- Self-motivated, open-minded, reliable and independent

You will learn:

- About eFront products and private equity
- Advanced usage of design tools with shared team UI library
- How to design UI for complex products in a big international company
- How to work with designers, developers and QA
